4-24 FEATURES AND OPTIONS

DIGI-STAR SCALE SYSTEM

HEAVY DRIVE SYSTEM

DUAL WHEEL

THE KIRBY HORIZONTAL MIXER GETS YOUR FEEDING DONE.

With the heaviest drive system on the market and a low power demand design, our horizontal mixers have been setting the bar for the industry since their inception. The 4-24 Series takes that performance to a new level with a compact, fuel efficient design. Reap savings in wearable part maintenance and fuel costs while producing a legendary mix and constant discharge. Take all your commodities and turn them into a TMR (Total Mixed Ration - typically consists of hay, silage, grains, almond hulls, agricultural waste, lettuce, carrots, potatoes, tomatoes, etc.) to increase the nutrition of your herd.

If your TMR consistency counts, count on Kirby.
